VALUE THE DIFFERENCE

INDEPENDENT AUDITOR'S REPORT

Board of Directors and Shareholders of
AltaPacific Bancorp
Santa Rosa, California

We have audited the accompanying consolidated financial statements of AltaPacific Bancorp, which are comprised of the consolidated balance sheets as of December 31, 2014 and 2013, and the related consolidated statements of income, comprehensive income (loss), changes in shareholders' equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of AltaPacific Bancorp as of December 31, 2014 and 2013, and the results of its operations and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

The accompanying notes are an integral part of these consolidated financial statements.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting and reporting policies of AltaPacific Bancorp (the Company) are in accordance with accounting principles generally accepted in the United States of America and conform to practices within the banking industry. A summary of the accompanying consolidated financial statements follows:

Nature of Operation

AltaPacific Bancorp is a California corporation registered as a bank holding company under the Bank Holding Company Act of 1956, as amended, and is headquartered in Santa Rosa, California. The Company was incorporated in March, 2010, and subsequently acquired all of the outstanding shares of AltaPacific Bank (the Bank). The formation of the bank holding company provides the Company and the Bank greater flexibility in terms of operation, expansion, and diversification.

AltaPacific Bancorp's principal business is to serve as a holding company for the Bank and its principal source of income will be derived from dividends paid by the Bank. The payment of dividends by the Bank is subject to restrictions that could limit AltaPacific Bancorp's payment of dividends to its shareholders.

The Bank

AltaPacific Bank was organized under the laws of the State of California on February 16, 2006. The Bank opened for business as a State-chartered non-member bank on July 10, 2006. On November 5, 2010, the Company became a member of the Federal Reserve System (FRB). On August 3, 2009, the Bank amended its articles of incorporation to change its legal name from Atlantic Pacific Bank to AltaPacific Bank.

The Bank is subject to regulation by the California Department of Business Oversight (the DBO) and the FRB and its deposits are insured by the Federal Deposit Insurance Corporation (FDIC) up to applicable legal limits. The Bank is headquartered in Santa Rosa, California, and also has branch offices in Rancho Cucamonga, Covina, Temecula, and Fallbrook, California. The Bank provides products and services to customers who are predominately small to middle-market business, professionals, and not-for-profit organizations. Generally, deposits are insured by the FDIC up to $250,000 per depositor.

Principles of Consolidation

The accounting and reporting policies of AltaPacific Bancorp and its subsidiary AltaPacific Bank (collectively, the Company) conform with accounting principles generally accepted in the United States of America and prevailing practices within the banking industry. Significant inter-company balances and transactions have been eliminated through consolidation.

In accordance with U.S. GAAP, the Company's investments in Mission Oaks Capital Trust I are not consolidated and are accounted for under the equity method and included in other assets on the consolidated balance sheet. The junior subordinated debentures issued and guaranteed by the Company and held by the trust are reflected on the Company's consolidated balance sheet.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Operating Segments

While the Company's executive officers monitor the revenue streams of the various products and services, operations are managed and financial performance is evaluated on a Company-wide basis. Operating results are not reviewed by senior management to make resource allocation or performance decisions. Accordingly, all of the financial service operations are considered by management to be aggregated in one reportable operating segment.

Reclassifications

Certain reclassifications have been made to the prior year's balances to conform to the classifications used in the current year.

Subsequent Events

The Company has evaluated subsequent events for recognition and disclosure through March 20, 2015, which is the date the financial statements were available to be issued.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. The allowance for loan losses, deferred tax assets, and fair values of financial instruments are particularly subject to change.

Cash and Cash Equivalents

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and due from banks and Federal funds sold. Generally, Federal funds are sold for one-day periods.

Investment Securities

Investment securities are classified into the following categories:

- Available-for-sale securities, reported at fair value, with unrealized gains and losses, to the extent losses are not considered other than temporary, excluded from earnings and reported, net of taxes, as accumulated other comprehensive income (loss) within shareholders' equity.

- Held-to-maturity securities, which management has the positive intent and ability to hold, reported at amortized cost, adjusted for the accretion of discounts and amortization of premiums.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Investment Securities, (Continued)

Management determines the appropriate classification of its investments at the time of purchase and may only change the classification in certain limited circumstances. All transfers between categories are accounted for at fair value. At December 31, 2014 and 2013, all securities are classified as available-for-sale and there were no transfers between categories for the years ended December 31, 2014 and 2013.

Gains and losses on the sale of investment securities are computed using the specific identification method. Interest earned on investment securities is reported in interest income, net of applicable adjustments for accretion of discounts and amortization of premiums.

An investment security is impaired when its carrying value is greater than its fair value. Investment securities that are impaired are evaluated on at least a quarterly basis and more frequently when economic or market conditions warrant such an evaluation to determine whether such a decline in their fair value is other than temporary. Management utilizes criteria such as the magnitude and duration of the decline and the intent and ability of the Company to retain its investment in the securities for a period of time sufficient to allow for an anticipated recovery in fair value, in addition to the reasons underlying the decline, to determine whether the loss in value is other than temporary. The term "other than temporary" is not intended to indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value is not necessarily favorable, or that there is a lack of evidence to support a realizable value equal to or greater than the carrying value of the investment. Once a decline in value is determined to be other than temporary, and management does not intend to sell the security or it is more likely than not that the Company will not be required to sell the security before recovery, only the portion of the impairment loss representing credit exposure is recognized as a charge to earnings, with the balance recognized as a charge to other comprehensive income. If management intends to sell the security or it is more likely than not that the Company will be required to sell the security before recovering its forecasted cost, the entire impairment loss is recognized as a charge to earnings.

Loans

Loans are stated at their outstanding principal balances reduced by any charge-offs or specific valuation accounts and net of any deferred fees or costs on originated loans, or unamortized premiums or discounts on purchased loans. Interest is accrued daily based upon outstanding loan balances. However, when, in the opinion of management, loans are considered to be impaired and the future collectability of interest and principal is in serious doubt, loans are placed on nonaccrual status and the accrual of interest income is suspended. Any interest accrued but unpaid is charged against income. Payments received are applied to reduce principal to the extent necessary to ensure collection. Subsequent payments on these loans, or payments received on nonaccrual loans for which the ultimate collectability of principal is not in doubt, are applied first to earned but unpaid interest and then to principal. Generally, loans are placed on non-accrual status when they are 90 days past due. Past due status is based on the contractual terms of the loan. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured. The Company's policy for placing loans on nonaccrual status, recording payments received on nonaccrual loans, resuming accrual of interest, and determining past due or delinquency status does not differ by portfolio segment, nor does it differ for loans modified in troubled debt restructurings.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Loans, (Continued)

All classified loans are evaluated for impairment and are considered impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due (including both principal and interest) in accordance with the contractual terms of the loan agreement. The policy for recognizing interest on impaired loans is the same as the policy described above and does not differ by portfolio segment.

A restructuring of a debt constitutes a troubled debt restructuring (TDR) if the Company for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider. Restructured workout loans typically present an elevated level of credit risk, as the borrowers are not able to perform according to the original contractual terms. Loans that are reported as TDRs are considered impaired and measured for impairment as described below.

Substantially all loan origination fees, commitment fees, direct loan origination costs and purchase premiums and discounts on loans are deferred and recognized as an adjustment of yield, to be amortized to interest income over the contractual term of the loan. The unamortized balance of deferred fees and costs is reported as a component of net loans.

Allowance for Loan Losses

The allowance for loan losses is a valuation allowance for probable incurred credit losses. Loan losses are charged against the allowance when management believes the uncollectability of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance. Management estimates the allowance balance required using past loan loss experience, the nature and volume of the portfolio, information about specific borrower situations and estimated collateral values, economic conditions, and other factors. Allocations of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in management's judgment, should be charged off. Amounts are charged-off when available information confirms that specific loans or portions thereof, are uncollectible. This methodology for determining charge-offs is consistently applied to each segment.

The allowance consists of specific and general reserves. Specific reserves relate to loans that are individually classified as impaired. A loan is impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. Factors considered in determining impairment include payment status, collateral value and the probability of collecting all amounts when due. Measurement of impairment is based on the expected future cash flows of an impaired loan, which are to be discounted at the loan's effective interest rate, or measured by reference to an observable market value, if one exists, or the fair value of the collateral for a collateral-dependent loan. The Company selects the measurement method on a loan-by-loan basis except that collateral-dependent loans for which foreclosure is probable are measured at the fair value of the collateral.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Allowance for Loan Losses, (Continued)

The Company recognizes interest income on impaired loans based on its existing methods of recognizing interest income on nonaccrual loans. Loans, for which the terms have been modified resulting in a concession, and for which the borrower is experiencing financial difficulties, are considered troubled debt restructurings and classified as impaired with measurement of impairment based on expected future cash flows discounted using the loan's effective rate immediately prior to the restructuring.

If a loan is impaired, a portion of the allowance is allocated so that the loan is reported, net, at the present value of estimated future cash flows using the loan's existing rate or at the fair value of collateral if repayment is expected solely from the collateral. Smaller balance, homogeneous loans are collectively evaluated for impairment.

General reserves cover non-impaired loans and are based on historical loss rates for each portfolio segment, adjusted for the effects of qualitative or environmental factors that are likely to cause estimated credit losses as of the evaluation date to differ from the portfolio segment's historical loss experience. Qualitative factors include consideration of the following: changes in lending policies and procedures; changes in economic conditions, changes in the nature and volume of the portfolio; changes in the experience, ability and depth of lending management and other relevant staff; changes in the volume and severity of past due, nonaccrual and other adversely graded loans; changes in the loan review system; changes in the value of the underlying collateral for collateral-dependent loans; concentrations of credit and the effect of other external factors such as competition and legal and regulatory requirements.

Portfolio segments identified by the Company include commercial, commercial real estate construction (including land and development loans) commercial real estate mortgage, installment, and home equity lines of credit. Relevant risk characteristics for these portfolio segments generally include debt service coverage, loan-to-value ratios and financial performance on non-consumer loans and credit scores, debt-to income, collateral type, and loan-to-value ratios for consumer loans.

These risk ratings are also subject to examination by independent specialists engaged by the Company and the Company's regulators. During these internal reviews, management monitors and analyzes the financial condition of borrowers and guarantors, trends in the industries in which borrowers operate and the fair values of collateral securing these loans. These credit quality indicators are used to assign a risk rating to each individual loan. The risk ratings do not differ by portfolio segment, and can be grouped into five major categories, defined as follows:

Pass - A pass loan is a strong credit with no existing or known potential weaknesses deserving of management's close attention.

Special Mention - A special mention loan has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or in the Company's credit position at some future date. Special Mention loans are not adversely classified and do not expose the Company to sufficient risk to warrant adverse classification.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Allowance for Loan Losses, (Continued)

Substandard - A substandard loan is not adequately protected by the current sound worth and paying capacity of the borrower or the value of the collateral pledged, if any. Loans classified as substandard have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. Well defined weaknesses include a project's lack of marketability, inadequate cash flow, or collateral support, failure to complete construction on time or the project's failure to fulfill economic expectations. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.

Doubtful - Loans classified doubtful have all the weaknesses inherent in those classified as substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently known facts, conditions, and values, highly questionable and improbable.

Loss - Loans classified as loss are considered uncollectible and charged off immediately.

The general reserve component of the allowance for loan losses also consists of reserve factors that are based on management's assessment of the following for each portfolio segment: (1) inherent credit risk, (2) historical losses, and (3) other qualitative factors. These reserve factors are inherently subjective and are driven by the repayment risk associated with each portfolio segment described below.

Commercial - Commercial loans generally possess a lower inherent risk of loss than real estate portfolio segments because these loans are generally underwritten to existing cash flows of operating businesses. Debt coverage is provided by business cash flows and economic trends influenced by unemployment rates and other key economic indicators are closely correlated to the credit quality of these loans.

Real Estate Construction - Commercial real estate construction loans (including land and development loans) generally possess a higher inherent risk of loss than other real estate portfolio segments. A major risk arises from the necessity to complete projects within specified cost and time lines. Trends in the construction industry significantly impact the credit quality of these loans, as demand drives construction activity. In addition, trends in real estate values significantly impact the credit quality of these loans, as property values determine the economic viability of construction projects.

Real Estate Mortgage - Commercial real estate mortgage loans generally possess a higher inherent risk of loss than other real estate portfolio segments, except land and construction loans. Adverse economic developments or an overbuilt market impact commercial real estate projects and may result in troubled loans. Trends in vacancy rates of commercial properties impact the credit quality of these loans. High vacancy rates reduce operating revenues and the ability for properties to produce sufficient cash flow to service debt obligations.

Consumer Installment - An installment loan portfolio is usually comprised of a large number of small loans scheduled to be amortized over a specific period. Most installment loans are made directly for consumer purchases, but business loans granted for the purchase of heavy equipment or industrial vehicles may also be included. Economic trends determined by unemployment rates and other key economic indicators are closely correlated to the credit quality of these loans. Weak economic trends indicate that the borrowers' capacity to repay their obligations may be deteriorating.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Allowance for Loan Losses, (Continued)

Consumer Other: Home Equity Lines of Credit - The degree of risk in the home equity lines of credit portfolio depends primarily on the loan amount in relation to collateral value, the interest rate and the borrower's ability to repay in an orderly fashion. These loans generally possess a lower inherent risk of loss than other real estate portfolio segments. Economic trends determined by unemployment rates and other key economic indicators are closely correlated to the credit quality of these loans. Weak economic trends indicate that the borrowers' capacity to repay their obligations may be deteriorating.

Although management believes the allowance to be adequate, ultimate losses may vary from its estimates. At least quarterly, the Board of Directors reviews the adequacy of the allowance, including consideration of the relative risks in the portfolio, current economic conditions, and other factors. If the Board of Directors and management determine that changes are warranted based on those reviews, the allowance is adjusted. In addition, the Company's primary regulators, the FRB and the DBO, as an integral part of their examination process, review the adequacy of the allowance. These regulatory agencies may require additions to the allowance based on their judgment about information available at the time of their examinations.

There were no significant changes to the Company's accounting policies or methodologies with respect to the allowance for loan losses from the prior year.

Allowance for Credit Losses on Off-Balance Sheet Credit Exposures

The Company also maintains a separate allowance for off-balance-sheet commitments. Management estimates anticipated losses using historical data and utilization assumptions. The allowance for off-balance sheet commitments is included in accrued interest payable and other liabilities on the balance sheet.

Premises and Equipment

Premises and equipment are carried at cost. Depreciation is determined using the straight-line method over the estimated useful lives of the related assets. The useful lives of furniture, fixtures and equipment are estimated to be 3 to 10 years. Leasehold improvements are amortized over the lesser of the respective lease term (including renewal periods that are reasonably assured) or their useful lives, which are generally 3 to 10 years. Leased equipment meeting certain capital lease criteria is capitalized and the present value of the related lease payments is recorded as a liability. Amortization of capital leases is computed using a straight-line method over the shorter of the estimated and useful life of the equipment or the initial lease term.

Certain operating leases contain scheduled and specified rent increases or incentives in the form of tenant improvement allowances or credits. The scheduled rent increases are recognized on a straight-line basis over the lease term as an increase in the amount of rental expense recognized each period. Lease incentives, including tenant improvement credits, are capitalized at the inception of the lease and amortized on a straight-line basis over the lease term as a reduction of rental expense. Amounts accrued in excess of amounts paid related to the scheduled rent increases and the unamortized deferred tenant improvement credits are included in accrued interest payable and other liabilities on the balance sheet.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Premises and Equipment, (Continued)

When assets are sold or otherwise disposed of, the cost and related accumulated depreciation or amortization are removed from the accounts, and any resulting gain or loss is recognized in income for the period. The cost of maintenance and repairs is charged to expense as incurred. The Company evaluates premises and equipment for financial impairment as events or changes in circumstances indicate that the carrying amount of such assets may not be fully recoverable.

Federal Home Loan Bank and Federal Reserve Bank Stock

The Company, as a member of the Federal Home Loan Bank of San Francisco (FHLB) and the FRB, is required to hold shares of capital stock in the FHLB and FRB in an amount specified by regulation and is adjusted periodically based on a determination made by the FHLB and FRB. At December 31, 2014 and 2013, the Company owned $1,607,000 and $1,104,000, respectively, of FHLB stock. At December 31, 2014 and 2013, the Company owned $1,322,000 and $1,319,000, respectively, of FRB stock.

These investments are recorded at cost, carried as restricted securities, and are periodically evaluated for impairment. Cash and stock dividends are both reported as income. These stocks are included in accrued interest receivable and other assets on the balance sheet.

Other Real Estate Owned

Assets acquired through or instead of loan foreclosure are initially recorded at fair value less costs to sell when acquired, establishing a new cost basis. These assets are subsequently accounted for at lower of cost or fair value less estimated costs to sell. If fair value declines subsequent to foreclosure, a valuation allowance is recorded through expense. Operating costs after acquisition are expensed.

Bank Owned Life Insurance

The Bank has purchased life insurance policies on certain key executives. Bank owned life insurance is recorded at the amount that can be realized under the insurance contract at the balance sheet date, which is the cash surrender value adjusted for other charges or other amounts due that are probable at settlement.

Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates which are expected to be applied to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance is recognized if, based on the weight of available evidence, management believes it is more likely than not that some portion or all of the deferred tax assets will not be realized.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Income Taxes, (Continued)

The Company considers all tax positions recognized in its financial statements for the likelihood of realization. When tax returns are filed, it is highly certain that some positions taken would be sustained upon examination by the taxing authorities, while others are subject to uncertainty about the merits of the position taken or the amount of the position that would be ultimately sustained. The benefit of a tax position is recognized in the financial statements in the period during which, based on all available evidence, management believes it is more likely than not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. Tax positions taken are not offset or aggregated with other positions. Tax positions that meet the more-likely-than-not recognition threshold are measured as the largest amount of tax benefit that is more than fifty percent likely of being realized upon settlement with the applicable taxing authority. The portion of the benefits associated with tax positions taken that exceeds the amount measured as described above, if any, is reflected as a liability for unrecognized tax benefits in the accompanying balance sheet along with any associated interest and penalties that would be payable to the taxing authorities upon examination. Interest expense and penalties associated with unrecognized tax benefits, if any, are classified as income tax expense in the statement of operations. The Company does not have a liability for unrecognized tax benefits, or uncertain tax positions, and has not accrued for any interest or penalties as of December 31, 2014 and 2013.

Earnings Per Share (EPS)

Basic earnings per share (EPS), which excludes dilution, is computed by dividing net income by the weighted-average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock, such as stock options, result in the issuance of common stock which shares in the earnings of the Company. The treasury stock method is applied to determine the dilutive effect of stock options in computing diluted earnings per share. Stock options totaling 62,000 and 3,828 for the years ended December 31, 2014 and 2013, respectively, were considered anti-dilutive and were excluded from the computation of diluted earnings per share because the assumed proceeds from exercise price, tax benefits, and average future compensation exceeded the average market price of the Company's common stock.

Share-Based Compensation

The Company has one share-based compensation plan, the Atlantic Pacific Bank 2006 Equity Incentive Plan (the Plan), which has been approved by its shareholders and permits the grant of stock options and restricted stock for up to 1,105,577 shares of the Company's common stock of which 363,122 were available for future grants at December 31, 2014. The Plan is designed to attract and retain employees and directors. The amount, frequency, and terms of share-based awards may vary based on competitive practices, the Company's operating results, and government regulations. New shares are issued upon option exercise or restricted share grants. The Plan does not provide for the settlement of awards in cash. The Plan requires that the option price may not be less than the fair market value of the stock at the date the option is granted, and that the stock must be paid in full at the time the option is exercised. All options expire on a date determined by the Board of Directors but not later than ten years from the date of grant. The vesting period is determined by the Board of Directors and is generally over a three to five year period.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Share-Based Compensation, (Continued)

Restricted stock awards are grants of shares of common stock that are subject to forfeiture until specific conditions or goals are met. Conditions may be based on continuing employment or achieving specified performance goals. During the period of restriction, participants holding restricted stock may have full voting and dividend rights. The restrictions lapse in accordance with a schedule or with other conditions determined by the board of directors. There have been no restricted stock awards granted since inception of the Company or its subsidiary.

The Company account for share-based compensation using a fair-value based method and requires that share-based compensation expense be recorded for all stock options that are ultimately expected to vest as the requisite service is rendered.

Management estimates the fair value of each option award as of the date of grant using a Black-Scholes-Merton option pricing formula and the following assumptions. Expected volatility is based on historical volatility of the Company's common stock over a preceding period commensurate with the expected term of the option. The "simplified" method described in the Securities and Exchange Commission's Staff Accounting Bulletin No. 110 is used to determine the expected term of the options. The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of grant with substantially the same term as the expected term of the option. Expected dividend yield was not considered in the option pricing formula since cash dividends have not been paid and there are no current plans to do so in the foreseeable future. In addition to these assumptions, management makes estimates regarding pre-vesting forfeitures that will impact total compensation expense recognized under the Plan.

Fair Value Measurement

Fair value is the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Current accounting guidance establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. That guidance describes three levels of inputs that may be used to measure fair value:

> Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date
>
> Level 2: Significant other observable inputs (other than Level 1 prices) such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data
>
> Level 3: Significant unobservable inputs that reflect an entity's own assumptions about the factors that market participants would use in pricing an asset or liability

See Notes 18 and 19 for more information and disclosures relating to the Company's fair value measurements.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Comprehensive Income

Comprehensive income is reported in addition to net income for all periods presented. Comprehensive income is a more inclusive financial reporting methodology that includes disclosure of other comprehensive income or loss that historically has not been recognized in the calculation of net income. Unrealized gains and losses on the Company's available-for-sale investment securities are included in other comprehensive income, adjusted for realized gains or losses included in net income. Total comprehensive income or loss and the components of accumulated other comprehensive income or loss is presented in the consolidated statements of comprehensive income (loss).

Recent Accounting Guidance Not Yet Effective

In January 2014, the FASB issued Accounting Standards Update (ASU) No. 2014-04, *Receivables—Troubled Debt Restructurings by Creditors (Subtopic 310-40): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure,* a consensus of the FASB Emerging Issues Task Force. This Update provides clarification as to when an in-substance repossession or foreclosure has occurred, i.e., the creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan and, therefore, the loan receivable should be derecognized and the real estate property should be recognized. Under ASU No. 2014-04, a creditor has received physical possession of residential real estate property collateralizing a consumer mortgage loan upon either (1) the creditor obtaining legal title to the property upon completion of a foreclosure or (2) the borrower conveying all interest in the property to the creditor to satisfy the loan through completion of a deed in lieu of foreclosure or a similar legal agreement. The Update also will require disclosure in annual and interim financial statements of both (1) the amount of foreclosed residential real estate property held by the creditor and (2) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. The amendments in this Update are effective for interim and annual periods beginning after December 15, 2014. Adoption of this Update is not expected to have a material impact on the Company's consolidated financial statements.

In January 2014, the FASB issued ASU No. 2014-02, *Intangibles – Goodwill and Other (Topic 350): "Accounting for Goodwill".* This Update allows an accounting alternative for the subsequent measurement of goodwill for entities that are not considered public business entities. An entity that elects the accounting alternative in this Update would amortize goodwill on a straight-line basis over 10 years, or less than 10 years if the entity demonstrates that another useful life is more appropriate. An entity that elects the accounting alternative is further required to make an accounting policy election to test goodwill for impairment at either the entity level or the reporting unit level. Goodwill would be tested for impairment when a triggering event occurs that indicates that the fair value of an entity (or a reporting unit) may be below its carrying amount. The accounting alternative, if elected, would be applied prospectively to goodwill existing as of the beginning of the period of adoption and new goodwill recognized in annual periods beginning after December 15, 2014, and interim periods within annual periods beginning after December 15, 2015. Early application is permitted, including application to any period for which the entity's annual or interim financial statements have not yet been made available for issuance. The Company is currently in the process of evaluating the impact of the adoption of this Update, but does not expect a material impact on the Company's consolidated financial statements.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Recent Accounting Guidance Not Yet Effective, (Continued)

In June 2014, the FASB issued ASU No. 2014-11, *Transfers and Servicing (Topic 860):"Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures."* This Update aligns the accounting for repurchase-to-maturity transactions and repurchase agreements executed as repurchase financings with the accounting for other typical repurchase agreements. Going forward, these transactions would all be accounted for as secured borrowings. The guidance eliminates sale accounting for repurchase-to-maturity transactions and supersedes the guidance under which a transfer of a financial asset and a contemporaneous repurchase financing could be accounted for on a combined basis as a forward agreement, which has resulted in outcomes referred to as off-balance-sheet accounting. The Update requires a new disclosure for transactions economically similar to repurchase agreements in which the transferor retains substantially all of the exposure to the economic return on the transferred financial assets throughout the term of the transaction. The Update also requires expanded disclosures about the nature of collateral pledged in repurchase agreements and similar transactions accounted for as secured borrowings. The Update is effective for interim or annual period beginning after December 15, 2014. All of the Company's repurchase agreements are typical in nature (i.e., not repurchase-to-maturity transactions or repurchase agreements executed as a repurchase financing) and are accounted for as secured borrowings. As such, the adoption of ASU No. 2014-11 is not expected to have a material impact on the Company's consolidated financial statements.

In August 2014, the FASB issued Accounting Standards Update ("ASU") No. 2014-14 *Receivables – Troubled Debt Restructurings by Creditors (Subtopic 310-40), Classification of Certain Government-Guaranteed Mortgage Loans upon Foreclosure.* This Update addresses classification of government-guaranteed mortgage loans, including those where guarantees are offered by the Federal Housing Administration ("FHA"), the U.S. Department of Housing and Urban Development ("HUD"), and the U.S. Department of Veterans Affairs ("VA"). Although current accounting guidance stipulates proper measurement and classification in situations where a creditor obtains from a debtor, assets in satisfaction of a receivable (such as through foreclosure), current guidance does not specify how to measure and classify foreclosed mortgage loans that are government-guaranteed. Under the provisions of this Update, a creditor would derecognize a mortgage loan that has been foreclosed upon, and recognize a separate receivable if the following conditions are met: (1) the loan has a government guarantee that is not separable from the loan before foreclosure, (2) at the time of foreclosure, the creditor has the intent to convey the real estate property to the guarantor and make a claim on the guarantee, and the creditor has the ability to recover under that claim, (3) at the time of foreclosure, any amount of the claim that is determined on the basis of the fair value of the real estate is fixed. This Update is effective for interim and annual periods beginning after December 15, 2014, for public business entities and after December 15, 2015, for non public business entities. The Company does not believe the adoption of this Update will have a material impact of the Company's consolidated financial statements.

NOTE 2 - ACQUISTIONS

Mission Oaks Bancorp Acquisition

On May 2, 2014, the Company acquired all of the assets and assumed all of the liabilities of Mission Oaks Bancorp (Mission) in exchange for cash of $3.5 million. Mission operated two branches, one of which was located at its headquarters in Temecula, California. The other branch was located in Fallbrook, California. The Company acquired Mission to strategically increase its existing presence in Southern California.

The acquisition of Mission is accounted for under the acquisition method of accounting. The acquired assets, assumed liabilities and identifiable intangible assets are recorded at their respective acquisition date fair values. Fair values are preliminary and subject to refinement for up to one year after the closing date of the merger as additional information regarding the closing date fair values become available.

The following table represents the assets acquired and liabilities assumed of Mission as of May 2, 2014, and the provisional fair value adjustments and amounts recorded by the Company in 2014, under the acquisition method of accounting.

	Mission Book Value	Fair Value Adjustments	Fair Value
Assets Required			
Cash and cash equivalents	$ 19,332,000	$ (3,462,000)	$ 15,870,000
Interest-bearing deposits in banks	2,379,000	-	2,379,000
Investments	7,571,000	-	7,571,000
Loans, gross	66,683,000	(9,006,000)	57,677,000
Allowance for loan losses	(2,488,000)	2,488,000	-
Fixed assets	93,000	-	93,000
Deferred tax assets	66,000	3,248,000	3,314,000
Other assets	5,466,000	660,000	6,126,000
Total Assets Acquired	$ 99,102,000	$ (6,072,000)	$ 93,030,000
Liabilities Assumed			
Deposits	$ 88,893,000	$ 167,000	$ 89,059,000
Junior subordinated debentures	7,732,000	(2,381,000)	5,351,000
Other liabilities	2,879,000	91,000	2,970,000
Total Liabilities Assumed	99,504,000	(2,123,000)	97,380,000
Excess of assets acquired Over Liabilities Assumed	(402,000)	402,000	-
	$ 99,102,000	$ (1,721,000)	$ 97,380,000
Goodwill recognized			$ 4,350,000

NOTE 2 - ACQUISTIONS, (CONTINUED)

Mission Oaks Bancorp Acquisition, (Continued)

In many cases, the fair values of assets acquired and liabilities assumed were determined by estimating the cash flows expected to result from those assets and liabilities and discounting them at appropriate market rates. The most significant category of assets for which this procedure was used was that of acquired loans. The excess of expected cash flows above the fair value of the majority of loans will be accreted to interest income over the remaining lives of the loans in accordance with FASB Accounting Standards Codification (ASC) 310-20 (formerly SFAS 91).

Certain loans, for which specific credit-related deterioration, since origination, was identified, are recorded at fair value, reflecting the present value of the amounts expected to be collected. Income recognition on these "purchased credit-impaired" loans is based on a reasonable expectation about the timing and amount of cash flows to be collected. Acquired loans deemed impaired and considered collateral dependent, with the timing of the sale of loan collateral indeterminate, remain on non-accrual status.

For loans acquired from Mission, the outstanding balance, expected cash flows to be collected and fair value as of the respective acquisition dates were as follows:

	Purchased Credit Impaired	All Other Acquired Loans
Outstanding Balance	$ 6,343,000	$ 60,340,000
Cash flows not expected to be collected	1,274,000	-
Expected cash flows	5,069,000	60,340,000
Interest component of expected cash flows	169,000	7,563,000
Fair value of acquired loans	$ 4,900,000	$ 52,777,000

In accordance with generally accepted accounting principles, there was no carryover of the allowance for loan losses that had been previously recorded by Mission.

The Company recorded a deferred income tax asset of $3,314,000 related to Mission's net operating loss carry-forward, as well as other tax attributes of Mission, along with the effects of fair value adjustments resulting from applying the acquisition method of accounting.

The fair value of savings and transaction deposit accounts acquired from Mission were assumed to approximate their carrying value, as these accounts have no stated maturity and are payable on demand.

NOTE 2 - ACQUISTIONS, (CONTINUED)

Mission Oaks Bancorp Acquisition, (Continued)

The operating results of the Company for the year ending December 31, 2014, includes the operating results of Mission since the acquisition date of May 2, 2014. The following summarizes the net interest and other income, net income, and earnings per share as if the merger with Mission was effective as of the beginning of the comparable prior annual reporting period presented. There was no material, nonrecurring adjustments to the proforma net interest and other income, net income, and earnings per share presented below:

	December 31,	
	2014	**2013**
Net interest and other income	$ 19,088,000	$ 15,383,000
Net income	3,064,000	1,469,000
Basic earnings per share	0.54	0.25
Diluted earnings per share	0.52	0.25

NOTE 3 - INVESTMENT SECURITIES

The amortized cost and estimated fair value of available-for-sale investment securities at December 31, 2014 consisted of the following:

December 31, 2014	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Corporate securities	$ 26,230,000	$ 1,388,000	$ -	$ 27,618,000
Mortgage-backed securities:				
Agency	38,539,000	194,000	(131,000)	38,602,000
Non-agency	18,024,000	489,000	(201,000)	18,312,000
Total Securities	$ 82,793,000	$ 2,071,000	$ (332,000)	$ 84,532,000

NOTE 3 - INVESTMENT SECURITIES (CONTINUED)

The amortized cost and estimated fair value of available-for-sale investment securities at December 31, 2013 consisted of the following:

December 31, 2013	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Corporate securities	$ 29,047,000	$ 1,483,000	$ (40,000)	$ 30,490,000
Mortgage-backed securities:				
Agency	26,261,000	148,000	(104,000)	26,305,000
Non-agency	18,005,000	450,000	(378,000)	18,077,000
Total Securities	$ 73,313,000	$ 2,081,000	$ (522,000)	$ 74,872,000

Net unrealized gains on available-for-sale investment securities totaling $180,000 were recorded net of $74,000 in tax expense, within shareholders' equity for the year ended December 31, 2014. Net unrealized losses on available-for-sale investment securities totaling $98,000 were recorded net of $40,000 in tax benefits, within shareholders' equity for the year ended December 31, 2013. For the years ended December 31, 2014 and 2013, proceeds from the sales of securities available for sale were $4,898,000 and $6,223,000, respectively. There were no calls, or transfers of available-for-sale investment securities for the years ended December 31, 2014 or 2013.

Investment securities with unrealized losses at December 31, 2014 and 2013 are summarized and classified according to the duration of the loss period as follows:

	Less than 12 Months		12 Months or More		Total	
December 31, 2014	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
Mortgage-backed securities:						
Agency	$ 12,475,000	$ (128,000)	$ 1,970,000	$ (3,000)	$ 14,445,000	$ (131,000)
Non-agency	1,236,000	(22,000)	6,334,000	(179,000)	7,570,000	(201,000)
	$ 13,711,000	$ (150,000)	$ 8,304,000	$ (182,000)	$ 22,015,000	$ (332,000)
December 31, 2013						
Corporate securities	$ 6,460,000	$ (40,000)	$ -	$ -	$ 6,460,000	$ (40,000)
Mortgage-backed securities:						
Agency	8,696,000	(67,000)	3,067,000	(37,000)	11,763,000	(104,000)
Non-agency	2,946,000	(31,000)	6,698,000	(347,000)	9,644,000	(378,000)
	$ 18,102,000	$ (138,000)	$ 9,765,000	$ (384,000)	$ 27,867,000	$ (522,000)

NOTE 3 - INVESTMENT SECURITIES, (CONTINUED)

The Company held 48 agency residential mortgage-backed securities of which 14 were in an unrealized loss position as of December 31, 2014, and 20 non-agency residential mortgage-backed securities of which 9 were in an unrealized loss position as of December 31, 2014. Twelve agency residential mortgage-backed securities had been in an unrealized loss position for less than 12 months, and eight non-agency residential mortgage-backed securities had been in an unrealized loss position for more than 12 months. None of the Company's corporate securities were in an unrealized loss position as of December 31, 2014. These unrealized losses were primarily caused by illiquidity in the marketplace and downgrades made by the rating agencies of the issuers. Management performed an impairment analysis using detailed cash flow analysis to determine the recoverability of all principal and interest contractually due. This analysis projects prepayments, expected housing price changes, delinquency and default rates, expected loss severities, and interest rates, while factoring in the underlying collateral.

The Company held one corporate security which was in an unrealized loss position as of December 31, 2013, and had been in an unrealized loss position for less than 12 months. The Company held 20 agency residential mortgage-backed securities of which nine were in an unrealized loss position as of December 31, 2013, and 17 non-agency residential mortgage-backed securities of which 10 were in an unrealized loss position as of December 31, 2013. Three agency residential mortgage-backed securities had been in an unrealized loss position for less than 12 months and eight non-agency residential mortgage-backed securities had been in an unrealized loss position for more than 12 months. These unrealized losses were primarily caused by illiquidity in the marketplace and downgrades made by the rating agencies of the issuers. Management performed an impairment analysis using detailed cash flow analysis to determine the recoverability of all principal and interest contractually due. This analysis projects prepayments, expected housing price changes, delinquency and default rates, expected loss severities, and interest rates, while factoring in the underlying collateral. For all securities in an unrealized loss position, based on management's analysis, and because management does not have the intent to sell these securities nor does management believe it is more likely than not that the Company will be required to sell these securities before a recovery of amortized cost, the Company does not consider these investments to be other-than-temporarily impaired at December 31, 2013.

NOTE 3 - INVESTMENT SECURITIES, (CONTINUED)

The amortized cost and estimated fair value of available-for-sale investment securities at December 31, 2014, by contractual maturity are shown below.

	Amortized Cost	Estimated Fair Value
Corporate securities		
Less than one year	$ -	$ -
One through five years	16,598,000	17,666,000
Five through ten years	9,632,000	9,952,000
	26,230,000	27,618,000
Mortgage-backed securities		
One through five years	141,000	141,000
Five through ten years	1,638,000	1,655,000
After ten years	36,760,000	36,806,000
	38,539,000	38,602,000
Non-agency		
Five through ten years	920,000	922,000
After ten years	17,104,000	17,390,000
	18,024,000	18,312,000
	$ 82,793,000	$ 84,532,000

Actual maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without prepayment penalties.

Investment securities with amortized cost totaling $34,856,000 and estimated fair values totaling $34,917,000 were pledged to secure borrowings with the Federal Home Loan Bank at December 31, 2014. Investment securities with amortized cost totaling $26,261,000 and estimated fair values totaling $26,304,000 were pledged to secure borrowings with the Federal Home Loan Bank at December 31, 2013 (see Note 10).

NOTE 4 - LOANS

Outstanding loans are summarized below:

	December 31,	
	2014	2013
Commercial	$ 14,097,000	$ 8,630,000
Real estate:		
Construction	56,931,000	42,822,000
Mortgage	148,975,000	88,814,000
Installment	3,447,000	3,051,000
Home equity lines of credit	3,446,000	832,000
Loans Receivable	226,896,000	144,149,000
Allowances for loan losses	(2,746,000)	(2,070,000)
Net deferred loan origination fees	(1,616,000)	(917,000)
Loans Receivable, net	$ 222,534,000	$ 141,162,000

Salaries and employee benefits totaling $192,000 and $215,000 were deferred as loan origination costs for the years ended December 31, 2014 and 2013, respectively.

As of December 31, 2014, the Company's loans included the remaining unaccreted discount of $8,530,000 related to the acquisition of Stellar Business Bank in 2012, and Mission Oaks Bancorp in 2014.

Certain loans are pledged as collateral for available borrowings with the FHLB. Pledged loans totaled $152,840,000 and $76,564,000 at December 31, 2014 and 2013, respectively (see Note 10).

Purchased Credit Impaired Loans (PCI)

The Company has purchased loans, for which there was, at acquisition, evidence of deterioration of credit quality since origination and it was probable, at acquisition, that all contractually required payments would not be collected. The Company has not recorded an allowance for loan and lease losses for these PCI loans. The carrying amount of those loans is as follows:

	December 31,	
	2014	2013
Real estate	$ 3,106,000	$ 110,000

NOTE 4 - LOANS (CONTINUED)

Accretable yield, or income expected to be collected, is as follows:

	December 31,	
	2014	2013
Balance at January 1	$ 10,000	$ 17,000
New loans purchased	169,000	-
Accretion of income	(4,000)	(7,000)
Disposals	(169,000)	-
Balance at December 31	$ 6,000	$ 10,000

NOTE 5 - ALLOWANCE FOR LOAN LOSSES

A summary of the changes in the allowance for loan losses follows as of December 31:

	2014	2013
Balance, beginning of year	$ 2,070,000	$ 1,659,000
Provision for credit losses	625,000	410,000
Recoveries of loans previously charged off	51,000	1,000
Balance, end of year	$ 2,746,000	$ 2,070,000

NOTE 5 - ALLOWANCE FOR LOAN LOSSES (CONTINUED)

The following table presents the activity in the allowance for loan losses for the year 2014, and the recorded investment in loans and impairment method as of December 31, 2014, by portfolio segment:

December 31, 2014	Commercial	Real Estate Construction	Real Estate Mortgage	Installment	Home Equity Lines of Credit	Total
Allowance for Loan Losses:						
Beginning of Year	$ 126,000	$ 673,000	$ 1,235,000	$ 24,000	$ 12,000	$ 2,070,000
Provisions (credits)	(8,000)	279,000	338,000	(11,000)	27,000	625,000
Recoveries	51,000	-	-	-	-	51,000
End of Year	$ 169,000	$ 952,000	$ 1,573,000	$ 13,000	$ 39,000	$ 2,746,000
Reserves:						
Specific	$ -	$ -	$ 240,000	$ -	$ -	$ 240,000
General	169,000	952,000	1,333,000	13,000	39,000	2,506,000
	$ 169,000	$ 952,000	$ 1,573,000	$ 13,000	$ 39,000	$ 2,746,000
Loans Evaluated for Impairment:						
Individually	$ -	$ -	$ 3,884,000	$ -	$ -	$ 3,884,000
Collectively	14,097,000	56,931,000	145,091,000	3,447,000	3,446,000	223,012,000
	$ 14,097,000	$ 56,931,000	$148,975,000	$ 3,447,000	$ 3,446,000	$226,896,000

NOTE 5 - ALLOWANCE FOR LOAN LOSSES (CONTINUED)

The following table presents the activity in the allowance for loan losses for the year 2013, and the recorded investment in loans and impairment method as of December 31, 2013, by portfolio segment:

December 31, 2013	Commercial	Real Estate Construction	Real Estate Mortgage	Installment	Home Equity Lines of Credit	Total
Allowance for Loan Losses:						
Beginning of Year	$ 372,000	$ 644,000	$ 563,000	$ 63,000	$ 17,000	$ 1,659,000
Provisions (credits)	(247,000)	29,000	672,000	(39,000)	(5,000)	410,000
Recoveries	1,000	-	-	-	-	1,000
End of Year	$ 126,000	$ 673,000	$ 1,235,000	$ 24,000	$ 12,000	$ 2,070,000
Reserves:						
Specific	$ -	$ -	$ 240,000	$ -	$ -	$ 240,000
General	126,000	673,000	995,000	24,000	12,000	1,830,000
	$ 126,000	$ 673,000	$ 1,235,000	$ 24,000	$ 12,000	$ 2,070,000
Loans Evaluated for Impairment:						
Individually	$ -	$ -	$ 909,000	$ -	$ -	$ 909,000
Collectively	8,630,000	42,822,000	87,905,000	3,051,000	832,000	143,240,000
	$ 8,630,000	$ 42,822,000	$ 88,814,000	$ 3,051,000	$ 832,000	$144,149,000

NOTE 5 - ALLOWANCE FOR LOAN LOSSES (CONTINUED)

The following table shows the loan portfolio allocated by management's internal risk ratings at December 31, 2014 and 2013:

December 31, 2014	Pass	Special Mention	Substandard	Impaired	Total
Commercial	$ 13,144,000	$ 846,000	$ 107,000	$ -	$ 14,097,000
Real estate:					
Construction	56,859,000	-	72,000	-	56,931,000
Mortgage	139,936,000	994,000	4,161,000	3,884,000	148,975,000
Installment	3,447,000	-	-	-	3,447,000
Home equity lines of credit	3,289,000	-	157,000	-	3,446,000
	$ 216,675,000	$ 1,840,000	$ 4,497,000	$ 3,884,000	$ 226,896,000
December 31, 2013					
Commercial	$ 8,257,000	$ 373,000	$ -	$ -	$ 8,630,000
Real estate:					
Construction	42,822,000	-	-	-	42,822,000
Mortgage	87,905,000	-	-	909,000	88,814,000
Installment	3,051,000	-	-	-	3,051,000
Home equity lines of credit	832,000	-	-	-	832,000
	$ 142,867,000	$ 373,000	$ -	$ 909,000	$ 144,149,000

At December 31, 2014, there was $2,000 in commercial loans past due between 30 and 89 days and still accruing. As of December 31, 2014, there were no loans past due 90 days or more and still accruing. At December 31, 2013, there were no loans past due 30 days or more and still accruing. Nonaccrual loans presented by loan class were as follows as of December 31, 2014 and 2013.

	Nonaccrual	
	2014	**2013**
Real estate:		
Mortgage	$ 3,106,000	$ 110,000

NOTE 5 - ALLOWANCE FOR LOAN LOSSES (CONTINUED)

Information relating to individually impaired loans presented by class of loans was as follows as of December 31, 2014 and 2013:

December 31, 2014	Unpaid Principal Balance	Recorded Investment	Related Allowance	Average Recorded Investment	Interest Income Recognized
With a Related Allowance Recorded					
Real estate	$ 778,000	$ 778,000	$ 240,000	$ 790,000	$ 39,000
Without a Related Allowance Recorded					
Real estate	4,537,000	3,106,000	-	4,651,000	-
Total	$ 5,315,000	$ 3,884,000	$ 240,000	$ 5,441,000	$ 39,000
December 31, 2013					
With a Related Allowance Recorded					
Real estate	$ 799,000	$ 799,000	$ 240,000	$ 808,000	$ 40,000
Without a Related Allowance Recorded					
Real estate	270,000	110,000	-	125,000	4,000
Commercial	9,000	-	-	3,000	50,000
	279,000	110,000	-	128,000	54,000
Total	$ 1,078,000	$ 909,000	$ 240,000	$ 936,000	$ 94,000

There was no interest income included above recognized on a cash basis in 2014 or 2013.

Troubled Debt Restructurings

As of December 31, 2014 and 2013, the Company has recorded investment in troubled debt restructurings of $778,000 and $799,000, respectively. The Company has allocated $240,000 of specific reserves for those loans at December 31, 2014 and 2013, and has not committed to lend additional amounts. There were no new TDRs in 2014 and 2013.

NOTE 6 - PREMISES AND EQUIPMENT

Premises and equipment consisted of the following:

	2014	2013
Furniture, fixtures and equipment	$ 4,093,000	$ 2,536,000
Leasehold improvements	1,889,000	1,702,000
	5,982,000	4,238,000
Accumulated depreciation and amortization	(5,085,000)	(3,146,000)
	$ 897,000	$ 1,092,000

Depreciation and amortization included in occupancy and equipment expense totaled $422,000 and $471,000 for the years ended December 31, 2014 and 2013, respectively.

NOTE 7 - CORE DEPOSIT INTANGIBLE ASSET

The core deposit intangible asset (CDI) is associated with the acquisition of Stellar Business Bank in 2012, and the acquisition of Mission Oaks Bancorp in 2014. The CDI asset is subject to amortization and is included in other assets on the Company's balance sheet. The following tables summarize the gross carrying amount, accumulated amortization and net carrying amount of CDI and provide an estimate for future amortization as of December 31, 2014.

	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Core deposit intangible	$ 1,760,000	$ (581,000)	$ 1,179,000

Year Ending	Amount
2015	$ 238,000
2016	208,000
2017	182,000
2018	153,000
2019	147,000
Thereafter	251,000
Total	$ 1,179,000

NOTE 8 - INTEREST-BEARING DEPOSITS

Interest-bearing deposits consisted of the following:

	2014	2013
Savings accounts	$ 2,801,000	$ 872,000
Money market accounts	133,375,000	115,045,000
Interest-bearing demand accounts	11,846,000	2,343,000
Time certificate of deposit accounts under $250,000	44,052,000	12,699,000
Time certificate of deposit accounts over $250,000	6,372,000	4,020,000
	$ 198,446,000	$ 134,979,000

The maturity of time deposits is as follows:

	2014	2013
Within one year	$ 41,074,000	$ 15,623,000
One year to three years	9,282,000	1,096,000
Over three years	68,000	-
	$ 50,424,000	$ 16,719,000

Interest expense recognized on interest-bearing deposits for the years ended December 31, consists of the following:

	2014	2013
Savings and money market accounts	$ 730,000	$ 700,000
Interest-bearing demand accounts	9,000	2,000
Time certificate of deposit accounts under $250,000	234,000	74,000
Time certificate of deposit accounts over $250,000	62,000	57,000
	$ 1,035,000	$ 833,000

NOTE 9 - INCOME TAXES

Income taxes for the years ended December 31, consisted of the following:

	2014	2013
Current Taxes:		
Federal	$ 1,476,000	$ 616,000
State	475,000	189,000
	1,951,000	805,000
Deferred Taxes:		
Federal	252,000	(19,000)
State	157,000	129,000
	409,000	110,000
Income Tax Expense	$ 2,360,000	$ 915,000

The following table reconciles the statutory tax rate to the consolidated effective income tax rate for the years ended December 31:

	2014	2013
Federal tax rate	34.0%	34.0%
State taxes, net of Federal tax benefits	7.1%	6.7%
Bank owned life insurance	-1.6%	-3.0%
Stock option compensation	0.3%	0.9%
Merger Expenses	0.9%	-
Other items, net	0.1%	0.3%
Provision for Income Tax	40.8%	38.9%

NOTE 9 - INCOME TAXES (CONTINUED)

Deferred tax assets (liabilities) at December 31, 2014 and 2013, consisted of the following:

	2014	2013
Deferred Tax Assets:		
Allowance for loan losses due to tax limitations	$ 193,000	$ 688,000
Organization costs	382,000	438,000
Share-based compensation	300,000	293,000
Unrealized losses on available-for-sale investment securities reported in net income	181,000	181,000
Net operating losses	1,796,000	1,339,000
Acquisition accounting adjustments	2,147,000	222,000
Depreciation	427,000	191,000
Reserves	810,000	245,000
Other	301,000	117,000
Total Deferred Tax Assets	6,537,000	3,714,000
Deferred Tax Liabilities:		
Unrealized losses on available-for-sale investment securities reported in other comprehensive income	713,000	639,000
Cash basis reporting for income tax purposes	56,000	137,000
Total Deferred Tax Liabilities	769,000	776,000
Net Deferred Tax Assets	$ 5,768,000	$ 2,938,000

The determination of the amount of deferred income tax assets which are more likely than not to be realized is primarily dependent on projections of future earnings, which are subject to uncertainty and estimates that may change given economic conditions and other factors. The realization of deferred income tax assets is assessed and a valuation allowance is recorded if it is more likely than not that all or a portion of the deferred tax asset will not be realized. "More likely than not" is defined as greater than a 50 percent chance. All available evidence, both positive and negative is considered to determine whether, based on the weight of that evidence, a valuation allowance is needed. Based upon its analysis of available evidence, management has determined that it is "more likely than not" that the Company's deferred income tax assets as of December 31, 2014 and 2013, will be fully realized and therefore no valuation allowance was recorded.

At December 31, 2014, the Company had Federal and State net operating loss carryforwards (NOLs) of approximately $4,411,000 and $4,139,000, respectively. The Federal and State NOLs begin to expire in 2030 and 2018, respectively.

NOTE 9 - INCOME TAXES (CONTINUED)

The Company files income tax returns in the United States and California jurisdictions. There are currently no pending Federal, State or local income tax examinations by tax authorities. Federal and California tax returns for 2011 to 2013 and 2010 to 2013, respectively, are currently open for examination. The total amount of unrecognized tax benefits, including interest and penalties, at December 31, 2014, was not material. The amount of tax benefits that would impact the effective rate, if recognized, is not expected to be material. The Company does not anticipate any significant changes with respect to unrecognized tax benefits within the next 12 months.

NOTE 10 - BORROWINGS

The Company has unsecured Federal funds lines of credit with three of its correspondent banks under which it can borrow up to $20,000,000. There was $555,000 outstanding under these lines of credit at December 31, 2014.

The Company has a borrowing arrangement with the Federal Home Loan Bank of San Francisco under which it may borrow an amount not to exceed 25 percent of total assets. Various loans totaling approximately $152,840,000 were pledged to secure FHLB borrowings as of December 31, 2014. In addition, investment securities with amortized costs of $34,856,000 and estimated fair values of $34,917,000 were pledged to secure the borrowing arrangement as of December 31, 2014. The total borrowing capacity under these arrangements was $84,480,000 at December 31, 2014. Various loans totaling approximately $76,564,000 were pledged to secure FHLB borrowings as of December 31, 2013. In addition, investment securities with amortized cost totaling $26,261,000 and estimated fair values of $26,304,000 were pledged to secure the borrowing arrangement as of December 31, 2013. The total borrowing capacity under these arrangements was $47,694,000 at December 31, 2013.

Advances under these arrangements were at fixed interest rates and consisted of the following at December 31, 2014 and 2013:

	Balance at December 31,					
	2014			**2013**		
Borrowings	Amount	Average Balance	Weighted Average Rate	Amount	Average Balance	Weighted Average Rate
Short-term	$ 555,000	$ 2,716,000	0.28%	$10,000,000	$ 5,841,000	1.12%
Long-term	20,000,000	10,466,000	0.53%	10,000,000	1,260,000	0.50%
	$20,555,000	$13,182,000	0.48%	$20,000,000	$ 7,101,000	1.01%

NOTE 11 - JUNIOR SUBORDINATED DEBT SECURITIES

The Company through the acquisition of Mission Oaks Bancorp, assumed the outstanding amount of Mission's junior subordinated debentures of $7,500,000. Mission's Capital Trust I (the Trust) was formed by Mission Oaks Bancorp in 2006 for the sole purpose of issuing trust preferred securities fully and unconditionally guaranteed by the Company. The Company issued $7,732,000 of junior subordinated debentures to the Trust in exchange for ownership of all of the common security of the Trust and the proceeds of the preferred securities sold by the Trust. The Company is not considered the primary beneficiary of this Trust, therefore the Trust is not consolidated in the Company's financial statements, but rather the fair value of the junior subordinated debentures is shown as a liability. The Company's investment in the common stock of the Trust is $232,000 and is included in other assets. At acquisition in May 2014, the debentures were recorded at a fair value of $5,351,000, with the discount being accreted to interest expense over the remaining life of the debentures. At December 31, 2014, the carrying value of the subordinated debentures totaled $5,423,000.

The Company may redeem the subordinated debentures, in whole or in part, in a principal amount with integral multiples of $1,000, at any time at 100 percent of the principal amount, plus accrued and unpaid interest. The subordinated debentures mature on June 15, 2036. The Company has the option to defer interest payments on the subordinated debentures from time to time for a period not to exceed five consecutive years.

The subordinated debentures may be included in Tier 1 capital (with certain limitations applicable) under current regulatory guidelines and interpretations. The subordinated debentures have a variable rate of interest of three-month London Interbank Offered Rate (LIBOR) plus 1.65 percent. At December 31, 2014, the interest rate for the subordinated debentures was 1.89 percent.

NOTE 12 - COMMITMENTS AND CONTINGENCIES

Operating Leases

The Company leases certain buildings used for branch offices and administrative facilities under long-term, non-cancelable lease agreements, which have been accounted for as operating leases. Such lease agreements expire between 2015 and 2019, and contain renewal options for various periods.

NOTE 12 - COMMITMENTS AND CONTINGENCIES (CONTINUED)

Operating Leases, (Continued)

Future minimum lease payments are as follows:

December 31,	Amount
2015	$ 652,000
2016	452,000
2017	254,000
2018	259,000
2019	106,000
Total	$ 1,723,000

Rental expense included in occupancy and equipment expense totaled $638,000 and $529,000 for the years ended December 31, 2014 and 2013, respectively. Management does not plan on exercising renewal options at some of the locations.

Financial Instruments With Off-Balance Sheet Risk

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business in order to meet the financing needs of its customers and to reduce its own exposure to fluctuations in interest rates. These financial instruments consist of the following at December 31, 2014 and 2013, respectively:

	2014	**2013**
Financial instruments whose contract amounts represent credit risks:		
Commitments to extend credit	$ 51,469,000	$ 49,697,000
Standby letters of credit	1,697,000	2,081,000
	$ 53,166,000	$ 51,778,000

The Company's exposure to credit loss in the event of nonperformance by the other party for commitments to extend credit is represented by the contractual amount of those instruments. The Company uses the same credit policies in making commitments as it does for loans included on the balance sheet.

NOTE 12 - COMMITMENTS AND CONTINGENCIES (CONTINUED)

Financial Instruments With Off-Balance Sheet Risk, (Continued)

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the borrower. Collateral held varies, but may include accounts receivable, inventory, and deeds of trust on residential real estate and income-producing commercial properties.

At December 31, 2014, commercial loan commitments represent approximately 26 percent of total commitments and are generally unsecured or secured by collateral other than real estate and have variable interest rates. Real estate loan commitments represent approximately 70 percent of total commitments and are generally secured by property with a loan-to-value ratio not to exceed 80 percent. The majority of real estate commitments also have variable interest rates. Home equity lines of credit represent nine percent of total commitments and are generally secured by residential real estate and have both variable and fixed interest rates.

Concentrations of Credit Risk

The Company grants real estate mortgage, real estate construction, and commercial loans to customers throughout the counties of Sonoma, Marin, San Francisco, San Bernardino, Riverside, and Los Angeles. Although management intends to continue to diversify the Company's loan portfolio, a substantial portion of the portfolio is secured by commercial and residential real estate at December 31, 2014 and 2013.

In management's judgment, a concentration of loans exists in real estate related loans with approximately 92 percent of the Company's loans being real estate related. Although management believes the loans within this concentration have no more than the normal risk of collectability, a substantial decline in the performance of the economy in general or a decline in real estate values in the Company's primary market area, in particular, could have an adverse impact on the collectability of these loans. Personal and business income represents the primary source of repayment for a majority of these loans

Correspondent Companying Agreements

The Company maintains funds on deposit with other federally insured financial institutions under correspondent banking agreements. Coverage through December 31, 2014, was $250,000 per depositor available under the FDIC's general deposit insurance rules.

NOTE 13 - RELATED PARTY TRANSACTIONS

As of December 31, 2014 and 2013, the Company's balance sheet included deposits from executive officers and directors and their related companies totaling $5,676,000 and $8,242,000, respectively, and loans to executive officers and directors and their related companies, which are detailed below:

	December 31,	
	2014	**2013**
Outstanding balance, beginning of year	$ 308,000	$ 25,000
Credit granted, including renewals	-	1,025,000
Repayments	(157,000)	(742,000)
Outstanding balance, end of year	$ 151,000	$ 308,000
Undisbursed commitments at end of year	$ 505,000	$ 1,558,000

In management's opinion, the terms and conditions associated with these arrangements are comparable to those of transactions with unaffiliated parties.

NOTE 14 - SHARE-BASED COMPENSATION

Stock Option Awards

A summary of option activity under the Plan for the years ended December 31, 2014, is presented below:

	2014		Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
	Options	Exercise Price		
Balance, beginning of year	702,242	$ 7.35		
Granted	45,938	9.18		
Forfeited or expired	(5,724)	6.95		
Balance, end of year	742,456	7.51	2.76 Years	$ 1,565,000
Options exercisable	663,945	$ 7.39	2.76 Years	$ 94,000
Options available for granting	363,122			

NOTE 14 - SHARE-BASED COMPENSATION (CONTINUED)

Stock Option Awards (Continued)

A summary of option activity under the Plan for the years ended December 31, 2013, is presented below:

	2013		Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
	Options	Exercise Price		
Balance, beginning of year	708,838	$ 7.35		
Granted	3,708	6.05		
Forfeited or expired	(10,304)	7.39		
Balance, end of year	702,242	$ 7.35	3.40 Years	$ 609,000
Options exercisable	648,352	$ 7.38	3.40 Years	$ 66,000
Options available for granting	384,128			

As of December 31, 2014, the unrecognized share-based compensation expense related to non-vested stock option awards totaled $108,000. That cost is expected to be amortized on a straight-line basis over a weighted average period of 1.8 years and will be adjusted for subsequent changes in estimated forfeitures. Total compensation cost included in operating expenses was $75,000 and $77,000 for the years ended December 31, 2014 and 2013, respectively. The weighted-average grant date fair value of options vested during the year was $77,000 and $79,000 for the years ended December 31, 2014 and 2013, respectively.

The following stock option information is for the year ended December 31:

	2014	2013
Dividend yield	0.00%	0.00%
Expected life	6.50 Years	6.50 Years
Expected volatility	45.70%	51.34%
Risk-free interest rate	1.97%	0.92%
Weighted-average grant date fair value	$4.44	$3.36

NOTE 15 - SHAREHOLDERS' EQUITY

Cash Dividends

Holders of Company common stock are entitled to receive dividends declared by the Board of Directors out of funds legally available, therefore, under certain Federal laws and regulations governing the banking and financial services business. In addition, the Company is subject to certain restrictions under certain Federal and State laws and regulations governing banks which limit their ability to transfer funds to the Company through intercompany loans, advances, or cash dividends.

Stock Dividends

On January 27, 2014, the Board of Directors declared a five percent stock dividend which was payable on February 28, 2014. On December 3, 2014, the Board of Directors declared a five percent stock dividend which was payable on February 20, 2015. All share and per share amounts have been restated to give retroactive effect to these five percent stock dividends.

NOTE 16 - BENEFIT PLANS

Salary Continuation Agreements and Officer Supplemental Life Insurance Plans

The Company has entered into salary continuation agreements with certain officers. The plans provide for annual benefits for up to fifteen years after retirement or death. The benefit obligation under these plans totaled $1,562,000 and $351,000, and was fully accrued for the years ended December 31, 2014 and 2013, respectively. The expense recognized under these arrangements totaled $529,000 and $301,000 for the years ended December 31, 2014 and 2013, respectively. Certain officers of the Company have supplemental life insurance policies with death benefits available to the officers' beneficiaries.

In connection with these plans, the Company has purchased, single premium life insurance policies with cash surrender values totaling $10,930,000 and $6,916,000 at December 31, 2014 and 2013, respectively.

Profit Sharing Plan

In 2006, the Company adopted a 401(k) Plan (the Plan) covering substantially all employees 21 years of age or older with three months of service. Eligible employees may elect to make tax deferred contributions up to the maximum amount allowed by law. The Plan is a Safe Harbor Plan and currently matches employee contributions up to four percent of compensation. In addition, the Company may make an annual discretionary profit-sharing contribution. Employee contributions, Company matching contributions, and related earnings are always 100 percent vested. Company profit-sharing contributions and related earnings vest 20 percent a year, with 100 percent vesting after five years of service. The Company's expense for matching contributions was $157,000 and $111,000 for the years ended December 31, 2014 and 2013, respectively. The Company did not make a discretionary profit-sharing contribution for the years ended December 31, 2014 or 2013.

NOTE 17 - OTHER EXPENSES

Other expenses for the years ended December 31 consists of the following:

	2014	2013
Data processing	$ 835,000	$ 474,000
Professional fees	761,000	268,000
Amortization of intangible assets	240,000	171,000
Regulatory assessments	234,000	153,000
Telephone and postage	153,000	99,000
Advertising and promotion	109,000	65,000
Office supplies	106,000	93,000
OREO	45,000	22,000
Other	702,000	471,000
	$ 3,185,000	$ 1,816,000

NOTE 18 - FAIR VALUE OF FINANCIAL INSTRUMENTS

The estimated carrying fair values of the Company's financial instruments at December 31, 2014, are as follows:

	December 31, 2014		Fair Value Measurements at December 31, 2014 Using:		
	Carrying Amount	Fair Value	Level 1	Level 2	Level 3
Assets					
Cash and due from banks	$ 3,274,000	$ 3,274,000	$ 3,274,000	$ -	$ -

NOTE 18 - FAIR VALUE OF FINANCIAL INSTRUMENTS, (CONTINUED)

The estimated carrying fair values of the Company's financial instruments at December 31, 2013, are as follows:

	December 31, 2013		Fair Value Measurements at December 31, 2013 Using:		
	Carrying Amount	Fair Value	Level 1	Level 2	Level 3
Assets					
Cash and due from banks	$ 6,079,000	$ 6,079,000	$ 6,079,000	$ -	$ -
Available-for-sale investment securities	74,872,000	74,872,000	-	74,872,000	-
Loans, net	141,162,000	144,326,000	-	-	144,326,000
Federal Reserve Bank stock	1,319,000	1,319,000	-	1,319,000	-
Federal Home Loan Bank stock	1,104,000	1,104,000	-	1,104,000	-
Accrued interest	953,000	953,000	953,000	-	-
Liabilities					
Deposits	$ 168,995,000	$ 168,885,000	$ 152,276,000	$ 16,609,000	$ -
Other borrowings	20,000,000	20,000,000	20,000,000	-	-
Accrued interest	67,000	67,000	67,000	-	-

These estimates do not reflect any premium or discount that could result from offering the Company's entire holdings of a particular financial instrument for sale at one time, nor do they attempt to estimate the value of anticipated future business related to the instruments. In addition, the tax ramifications related to the realization of unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in any of these estimates.

The following methods and assumptions were used to estimate the fair value of significant financial instruments:

Financial Assets

The carrying amounts of cash, short-term investments, due from customers on acceptance and Bank acceptances outstanding are considered to approximate fair value. Short-term investments include federal funds sold, securities purchased under agreements to resell, and interest-bearing deposits with banks. The determination of the fair value of investment securities is discussed below. The fair value of loans are estimated using a combination of techniques, including discounting estimated future cash flows and quoted market prices of similar instruments where available.

NOTE 18 - FAIR VALUE OF FINANCIAL INSTRUMENTS, (CONTINUED)

Financial Liabilities

The carrying amounts of deposit liabilities payable on demand, and other borrowed funds are considered to approximate fair value. For fixed maturity deposits, fair value is estimated by discounting estimated future cash flows using currently offered rates for deposits of similar remaining maturities. The fair value of long-term debt is based on rates currently available to the Bank for debt with similar terms and remaining maturities. The fair values of subordinated debentures are determined based on the current market value for like instruments of a similar maturity and structure.

Off-Balance Sheet Financial Instruments

The fair value of commitments to extend credit and standby letters of credit is estimated using the fees currently charged to enter into similar agreements. The fair value of thee financial instruments is not material.

NOTE 19 - FAIR VALUE MEASUREMENTS

The following description of valuation methodologies used for assets recorded at fair value:

Securities

The fair values of securities available for sale are determined by obtaining quoted prices on nationally recognized securities exchanges (Level 1) or matrix pricing, which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted prices for specific securities but rather by relying on the securities relationship to other benchmark quoted securities resulting in a Level 2 classification.

Collateral-Dependent Impaired Loans

The Company does not record loans at fair value on a recurring basis. However, from time to time, fair value adjustments are recorded on these loans to reflect (1) partial write-downs, through charge-offs or specific reserve allowances, that are based on the current appraised or market-quoted value of the underlying collateral. The fair value estimated for collateral-dependent impaired loans are generally based on recent real estate appraisals or broker opinions, obtained from independent third parties, which are frequently adjusted by management to reflect current conditions (Level 3).

Other Real Estate Owned

Other real estate owned represents real estate that has been foreclosed and adjusted to fair value, less selling costs. At the time of foreclosure, these assets are recorded at fair value less costs to sell, which becomes the asset's new basis. Any write-downs based on the asset's fair value at the date of foreclosure are charged to the allowance for loan losses. The fair value of other real estate owned is generally based on recent real estate appraisals or broker opinions, obtained from independent third parties, which are frequently adjusted by management to reflect current conditions and estimated selling costs (Level 2).

NOTE 19 - FAIR VALUE MEASUREMENTS (CONTINUED)

Assets Recorded at Fair Value

The following table's present information about the Company's assets and liabilities measured at fair value on a recurring and nonrecurring basis:

	Fair Value Measurements			
December 31, 2014	Level 1	Level 2	Level 3	
Assets Measured at Fair Value on a Recurring Basis				
Assets:				
Securities available-for-sale	$ -	$ 84,532,000	$ -	
Assets Measured at Fair Value on a Non-Recurring Basis				
Collateral-Dependent Impaired Loans, Net of Specific Reserves:				Total Losses
Real estate - commercial	$ -	$ -	$ 3,644,000	$ -
Other real estate owned	-	448,000	-	-
December 31, 2013				
Assets Measured at Fair Value on a Recurring Basis				
Assets:				
Securities available-for-sale	$ -	$ 74,872,000	$ -	
Assets Measured at Fair Value on a Non-Recurring Basis				
Collateral-Dependent Impaired Loans, Net of Specific Reserves:				Total Losses
Real estate - commercial	$ -	$ -	$ 669,000	$ -
Other real estate owned	-	591,000	-	-

As of December 31, 2014, collateral-dependent impaired loans, which are measured for impairment using the fair value of the collateral, had a carrying value of approximately $3,884,000, with a specific reserve of $240,000.

The Company did not incur any losses recognized for write-down of other real estate owned for the years ended December 31, 2014 and 2013.

The Company had no liabilities measured at fair value on a recurring or non-recurring basis at December 31, 2014 and 2013.

NOTE 20 - MINIMUM REGULATORY CAPITAL REQUIREMENTS

Regulatory Capital

The Company and Bank are subject to certain regulatory capital requirements administered by the Board of Governors of the Federal Reserve System and the Federal Deposit Insurance Corporation (FDIC). Failure to meet these minimum capital requirements can initiate certain mandatory and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on the Company's consolidated financial statements. As a small bank holding company, the Company is not subject to specific regulatory capital requirements. The risk-based capital guidelines described below apply on a consolidated basis to bank holding companies with consolidated assets of $500 million or more. For bank holding companies with less than $500 million in consolidated assets, the guidelines will be applied on a bank-only basis unless: (a) the parent bank holding company is engaged in nonbank activity involving significant leverage; or (b) the parent company has a significant amount of outstanding debt that is held by the general public. Because neither (a) nor (b) apply to the Company, regulators look to the Bank's capital ratios when assessing the adequacy of the Company's capital.

Under capital adequacy guidelines, the Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. These quantitative measures are established by regulation and require that minimum amounts and ratios of total and Tier 1 capital to risk-weighted assets and of Tier 1 capital to average assets be maintained as set forth in the table below. The Company's and Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. Management believes the Company and Bank met all of their capital adequacy requirements as of December 31, 2014 and 2013.

The Bank is also subject to additional capital guidelines under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum ratios of total and Tier 1 capital to risk-weighted assets and Tier 1 capital to average assets as set forth in the table on the following page. The most recent notification from the FRB categorized the Bank as well capitalized under these guidelines. There are no conditions or events since that notification that management believes have changed the Bank's category.

NOTE 20 - MINIMUM REGULATORY CAPITAL REQUIREMENTS (CONTINUED)

The Bank's actual capital amounts and notations of December 31, 2014 and 2013 are as follows:

	Actual		For Capital Adequacy Purposes		To Be Well-Capitalized Under Prompt Corrective Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of December 31, 2014						
Total capital (to risk-weighted assets)	$ 50,260,000	16.8%	$ 23,931,000	8.0%	$ 29,914,000	10.0%
Tier 1 capital (to risk-weighted assets)	47,397,000	15.8%	11,966,000	4.0%	17,948,000	6.0%
Tier 1 capital (to average assets)	47,397,000	13.8%	13,714,000	4.0%	17,143,000	5.0%
As of December 31, 2013						
Total capital (to risk-weighted assets)	$ 47,280,000	22.2%	$ 17,071,000	8.0%	$ 21,339,000	10.0%
Tier 1 capital (to risk-weighted assets)	45,153,000	21.2%	8,535,000	4.0%	12,803,000	6.0%
Tier 1 capital (to average assets)	45,153,000	18.6%	9,717,000	4.0%	12,147,000	5.0%
